

CLOCK SUDBURY

While retaining its signature look and proven performance, the new Sudbury introduces a series of subtle but meaningful updates, including a move from the magnetic door closure to a positive locking latched handle, a newly removable top flue collar to aid installation, and a slight adjustment to the height of the front log retainer. Each stove now comes with a stainless steel handle as standard, with an optional black handle and dial available for those seeking a different aesthetic. Still 81% efficient, smoke control exempt, and engineered for reliability, the new Sudbury is a perfectly balanced addition to any contemporary or traditional stove collection.

LOG BOX OPTION

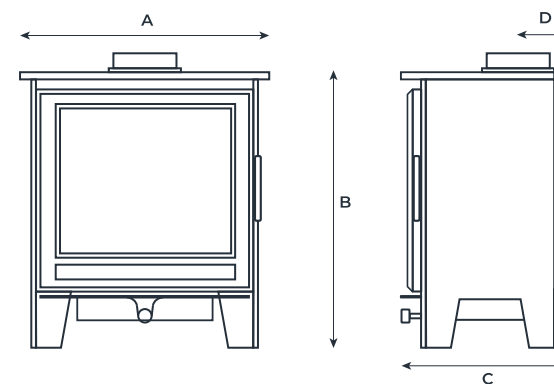

Available in Black only with Stainless Steel Dial and factory-fitted Heat Shield as standard.

Optional Extras (Additional Cost):

- Black Handle & Dial Set
- Direct Air Kit

For best performance we recommend these distances to non-combustible materials. A Heat Shield reduces the rear distance to combustibles to 200mm, but will not reduce the distance to non-combustibles.

Dimensions	A	B	C	D	Weight
Clock Sudbury Mk2	545mm	610mm	345mm	90mm	93kg
Clock Sudbury Mk2 with Logstore	545mm	850mm	345mm	90mm	130kg
